

Cesar Calderon

Data Analysis · Data Visualization · Development

Chicago, IL

I build data products that turn complex information into tools people can understand and use. My work connects journalism, public information, analytics, and interactive technology.

EXPERIENCE

Better Government Association

Web Developer & Digital Content Manager

February 2021 – Present · Chicago, IL

- Support technical and data-related work across the BGA, Illinois Answers Project, and BGA Policy.
- Build data visualizations, interactive tools, analytics systems, and cloud applications in collaboration with journalists, policy analysts, and editors.
- Independently own technical projects and communicate technical information to non-technical stakeholders.

Chicago Public Schools

Technology Coordinator · September 2017 – July 2019

SELECTED PROJECTS

Inside Illinois Jails · Illinois Answers Project

Worked with the reporting team on digital presentation, interactive storytelling, public-record exploration, responsive UX, and analytics for a major investigation into Illinois county jails.

Svelte / SvelteKit · JavaScript · AWS · GA4 · Parse.ly

Budget Snapshots · BGA Policy

Collaborate with policy analysts on data preparation and visual explanations of Chicago budget and staffing data, including recurring comparisons and reusable visualization approaches.

D3.js · JavaScript · HTML/CSS · Google Sheets · Datawrapper · Flourish

Republication Analytics System · Illinois Answers Project

Designed and developed an event-tracking pipeline for stories republished on external websites, connecting JavaScript collection, AWS processing, structured database storage, and SQL-based reporting.

JavaScript · AWS Lambda · API Gateway · Supabase · SQL

TOOLKIT

Data & analysis

Python, SQL, R, Pandas, Excel, Google Sheets, statistical analysis

Visualization

D3.js, Datawrapper, Flourish, Chart.js, Mapbox, Leaflet, Looker Studio

Application development

JavaScript, TypeScript, Svelte / SvelteKit, React, Node.js, HTML, CSS, REST APIs

Cloud & workflow

AWS Lambda, API Gateway, S3, CloudFront, Supabase, DynamoDB, GA4, Parse.ly, Git, GitHub

AI-assisted development and data workflows; code generation and debugging.

EDUCATION

DePaul University

Bachelor of Science in Information Technology · Web Development focus

Magna Cum Laude · GPA: 3.8 / 4.0

Additional coursework in statistics, biostatistics, epidemiology, and quantitative analysis.
